

# Explicit Intents

---

1. Tạo source cho spinner.

```
<string-array name="intents">
    <item>Open Browser</item>
    <item>Call Someone</item>
    <item>Dial</item>
    <item>Take picture</item>
    <item>Show contacts</item>
    <item>Edit first contact</item>
</string-array>
```

2. Cấp quyền cho Intent

```
<uses-permission android:name="android.permission.CALL_PRIVILEGED" >
</uses-permission>
<uses-permission android:name="android.permission.CALL_PHONE" >
</uses-permission>
<uses-permission android:name="android.permission.CAMERA" >
</uses-permission>
<uses-permission android:name="android.permission.READ_CONTACTS" >
</uses-permission>
<uses-permission android:name="android.permission.INTERNET"/>
```

3. Bắt sự kiện khi 1 chọn xong spinner và button "bt" được click sẽ xét xem spinner chọn gì để mở intent tương ứng

```

        bt.setOnClickListener(new OnClickListener() {

            public void onClick(View v) {
                int position = spinner.getSelectedItemPosition();
                Intent intent = null;
                switch (position) {

                    case 0:
                        intent = new Intent(Intent.ACTION_VIEW,
                                           Uri.parse("http://vnexpress.net"));
                        break;
                    case 1:
                        intent = new Intent(Intent.ACTION_CALL,
                                           Uri.parse("tel:(+84)903123456"));
                        break;
                    case 2:
                        intent = new Intent(Intent.ACTION_DIAL,
                                           Uri.parse("tel:(+84)903123456"));
                        startActivity(intent);
                        break;
                    case 3:
                        intent = new
Intent("android.media.action.IMAGE_CAPTURE");
                        break;

                    case 4:
                        intent = new Intent(Intent.ACTION_VIEW,
                                           Uri.parse("content://contacts/people/"));
                        break;
                    case 5:
                        intent = new Intent(Intent.ACTION_EDIT,
                                           Uri.parse("content://contacts/people/1"));
                        break;

                }
                if (intent != null) {
                    startActivity(intent);
                }
            }

        });
    }
}

```
